HarvestFresh

## Inspirisan prirodom, pokrenut svetlošću

Vitamini u voću i povrću se više ne gube u frižideru! HarvestFresh tehnologija u 3 boje oponaša 24-časovni ciklus sunca unutar posude, čuvajući vitamine duže. Ova jedinstvena tehnologija u vašem frižideru će vam omogućiti da uživajte u hranljivim obrocima i zdravijem načinu života.

### CoolRoom

## Meat, fish & dairy fresher for longer

Meat, fish, and dairy need lower temperatures to stay fresh. The CoolRoom compartment keeps these products at just above freezing temperatures and maintains optimum humidity. That way, food remains fresh and full of flavour for up to twice as long.

### Led Illumination

## Clear view of the inside

It can be tricky to see everything in your fridge, especially in the corners and at the back of selves. Led Illumination features chains of LED on the top of the fridge, and for every shelf on the side wall so you can see clearly throughout the cooler. It's more energy-efficient than standard lighting too.

### Reversible Door

## Adjustable door direction to fit your kitchen layout

Some kitchen layouts require that refrigerator doors open in one direction and not the other. Reversible Door allows door hinges to be placed on both the left and the right of the unit, so decide which way your fridge doors open. Plus, you can double your cooling capacity by placing two fridges side by side and reversing the doors of one.

### Safety Glass

## High-durability glass shelves

Ease your worries of putting that huge and heavy pot in the fridge with Safety Glass. Safety Glass shelves are made up of tempered glass and can carry loads of up to 25 kg. They resist cracks and scratches much better than un-treated glass, so you can store heavy items without a care.

### SmoothFit

## 90° door opening for convenience

Some kitchens have a challenging layout with appliances in awkward places. SmoothFit doors don't go past the side panel when opened 90 degrees, meaning the fridge can easily be positioned at the corner of a room or next to a wall without compromising ease of use. Crispers come all the way out too!

Vacation Mode

## Extra energy saving

Get your fridge in the holiday spirit when you leave for vacation. Vacation Mode saves energy by shutting down the cooler section but keeping the freezer running. Frozen food will be preserved while you save on energy bills.
